LETTER OF RECOMMENDATION

November 8, 2010

Re: Larry R. Barrow, DDes, AIA

To Whom It May Concern:

I am pleased to provide this letter of recommendation for Larry Barrow, whom I have known professionally and personally for over twenty-five years.

As an architect, I have found Larry to be creative, practical and resourceful. In the early 1980's he designed and supervised the renovation of a 5,000 square foot office building I owned, and later designed and supervised an extensive renovation of my home.

In 1985 Larry designed a 7,500 square foot office building for me, which we completed in 1986. In 1993 we moved to a 10,000 square foot commercial office building which Larry designed, and supervised until completion. In 1997 we completed a 5,000 square foot addition to that building, and in 2002 completed an 8,000 square foot addition, both of which were designed and supervised by Larry Barrow. Most recently he was instrumental in assisting our growing company with planning for future space requirements and building needs.

In each project, Larry has been very helpful to me as the owner, in conceptualizing and putting ideas into the actual design, and keeping the projects within budget. His years in the construction field enable him to approach the process in a very practical and methodical manner. The builders he has worked with respect him, and most of all his buildings have been very functional as well as appealing. I have been very pleased with the result.

Having now earned his Doctorate in Design from Harvard University, Larry has further prepared himself to provide exceptional architectural services using modern techniques and methodologies. I highly recommend him both personally and professionally and if contacted I would be happy to provide additional information.

Sincerely,

H. Britt Landrum, Jr.
President
